

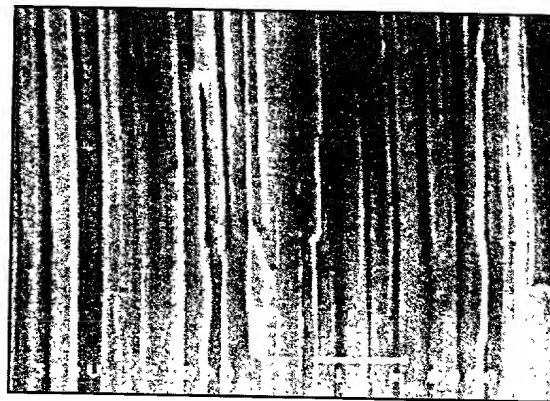

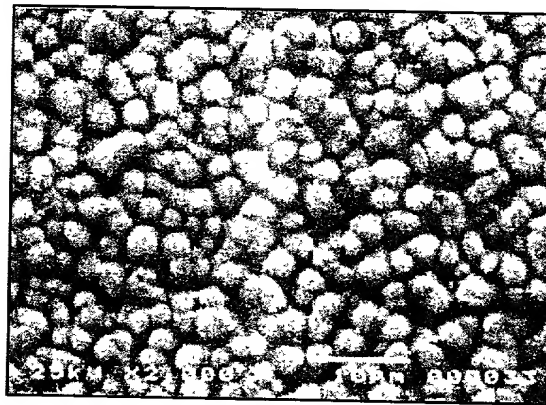

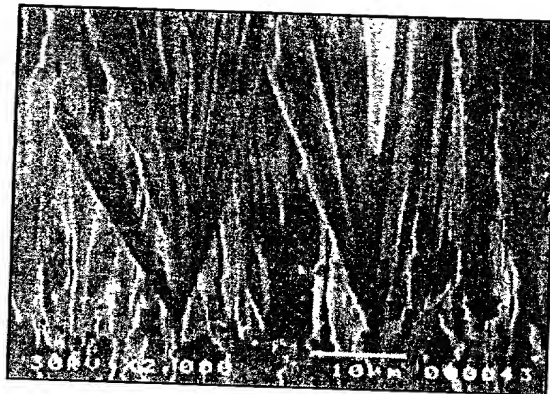

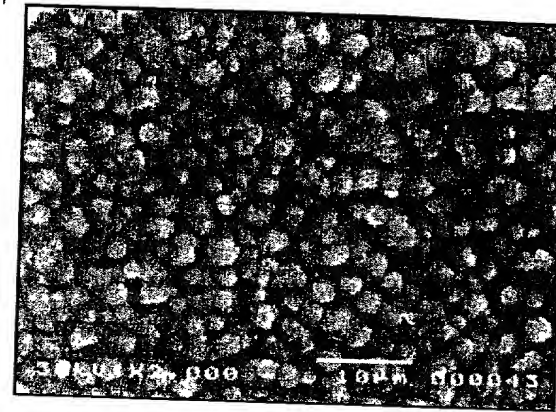

FIG. 1

09870679, 43001

The figure consists of two scanning electron micrographs (SEM) of polypropylene. The top image shows a granular surface texture, likely from a melt-crystallized sample, with a scale bar indicating 10 micrometers. The bottom image shows a fibrous or striated texture, likely from a fiber-spun sample, with a scale bar indicating 10 micrometers. Both images include technical data at the bottom: '30KV X2,000' and '00002'.
